Hi Rishab,

On behalf of the Python in Astronomy 2020 SOC, I would like to invite you to present your talk "Presenting ImageCube" as a scheduled unconference session at our meeting this year in Dublin. Yours will be one of 5 scheduled unconference sessions to be given on the first two days of the conference. A detailed schedule will be available in early March.

Unconferences are smaller break-out sections that allow for more in depth discussion of specific topics. Each unconference session runs for an hour, which you can divide between lecture/tutorial/q&a/discussion as you see fit.

Please let us know at your earliest convenience, no later than 1 March, whether you are willing to present. Do not hesitate to contact us if you have any questions.

Looking forward to seeing you in Dublin in April!

Sincerely,

Clara Brasseur

On behalf of the PyAstro20 SOC:

- Monica Bobra (co-chair)
- Drew Leonard (co-chair)
- Will Barnes
- Clara Brasseur
- Juan Luis Cano
- Rebecca Lange
- Sophie Murray (LOC chair)
